

October 2010 Update on Activities

Water Hyacinth stuff ready for Briquettes making

Making fuel Briquettes as the Government officials looks on

Demonstrating how fuel Briquettes from water hyacinth burns in our biochar stoves. The Government officials are very much impressed with our community work.

Fuel briquettes burning in our biochar stove as the Government officials takes note.

Char produced by our biochar cooking stove (sample).

Government officials in our biochar test plots. They have seen the difference in plots with char and plots without char. Plots with char have good crops as compared to other non char plots

Provincial Health Officer Dr Owala going through our improved cooking stove reports as the community follow up with him. We submitted our ICS report to his provincial officer in Kakamega.

The community together with Government official

dining

Thank you very much for supporting our community level development activities in Western Kenya.

With Much Thanks and Appreciation

Salim
