

# 2019 International Conference on Technical and Engineering Challenges of Addressing Sustainable Development

December 12-13, 2019 | Korea University, Seoul, South Korea

Scientists and policy makers will gather at the Korea University in Seoul to discuss technical and engineering challenges of addressing the 2030 Agenda for Sustainable Development and the 17 Sustainable Development Goals (SDGs).

The conference is chaired by Dr. Yong Sik Ok, Korea University, South Korea and co-organized by the AIChE Institute for Sustainability and the Association of Pacific Rim Universities (APRU).

The **Institute for Sustainability** is a technological community of the **American Institute of Chemical Engineers (AIChE)**.

The purpose of IfS is to serve the needs of and influence the efforts of professionals, academes, industries, and governmental bodies that contribute to the advancement of sustainability and sustainable development.

The Institute for Sustainability provides multidisciplinary technical rigor to sustainability discussions, advances sustainability education, research and development, and facilitates development of measurement tools and frameworks to guide design of more sustainable products and processes.

As a network of leading universities linking the Americas, Asia and Australasia, the **Association of Pacific Rim Universities (APRU)** is the Voice of Knowledge and Innovation for the Asia-Pacific region. We bring together thought leaders, researchers, and policy-makers to exchange ideas and collaborate on effective solutions to the challenges of the 21st century.

We leverage collective education and research capabilities of our members into the international public policy process. Our primary research areas include natural hazards & disaster risk reduction, women in leadership, population aging, global health, sustainable cities, artificial intelligence & the future of work, the Pacific Ocean, and labor mobility.
