

IBI Biochar Certification Program

List of Participating Laboratories (United States)

Version - Phase 1

Last Updated: November 5, 2013

NOTE: The following is a listing of laboratories that IBI knows to be conducting the required tests necessary for certification as part of the IBI Biochar Certification Program. By listing these laboratories, IBI confers no endorsement or quality assurances regarding these laboratories, nor does it make any claims regarding the validity of the laboratory or its test results. This listing is offered to allow manufacturers to more easily identify laboratories willing to do the requisite tests, and will be updated at least quarterly. Biochar manufacturers/applicants are not required to use laboratories that IBI lists, and are free to select a laboratory of their choice as long as the laboratory(ies) selected are appropriately licensed, professionally accredited, and follow IBI-required test methodologies. By making use of a laboratory for the required testing, participating biochar manufacturers agree to defend and hold IBI harmless from and against any and all claims, actions, demands, liabilities, losses, settlements, costs and fees (including, without limitation, reasonable attorneys' fees and court costs) arising from or allegedly arising from any results of laboratory testing.
